

Leang Panhasaovordy

Backend Developer

Profile

I'm a dedicated and motivated professional focused on building strong, secure, and efficient software solutions. Committed to continuous learning and collaboration, I strive to deliver reliable results while adapting quickly to new challenges and technologies.

Experiences

Software developer Intern, AUB Application Development Unit

DECEMBER 2024 - PRESENT

Collaborated in a development team to deliver a real-world POS application, applying MVC architecture, RESTful API development, and database normalization. Gained experience in the full software development lifecycle, version control, and deployment using Docker, while contributing to both front-end UI design and back-end logic with optimized, efficient code.

Event Organizer Volunteer

NOVEMBER 2024

Event Organizer Volunteer – Coordinated a team to plan and execute events, managing schedules, resources, and communication under tight deadlines.

Education

Bachelor in Computer Science and Engineering, Acleda University of Business, Phnom Penh

FEBRUARY 2024 - PRESENT

Gained a strong foundation in computer science through coursework and practical projects, applying theoretical knowledge to real-world challenges. Collaborated with peers on diverse assignments, strengthening problem-solving, teamwork, and communication skills under the guidance of experienced professors.

Certificate

- Certificate of Completion, ETEC center
- Java Programming Masterclass, Alison
- Bridging Course Computer, Acleda University of Business
